

## /// GET HOOKED WITH ESTEX!

### New Wider Hook

1.4" wide

Lays Flat to the Liner

Estex Manufacturing's bucket hook, catalog number 1831 has been redesigned to fit the higher rated aerial lift baskets with an extra thick lip. As always we re-engineered a hook that will meet the demands and quality you require.

Some round headed hooks were designed to meet this need, but they often get in the Lineman's way. The NEW 1831 will eliminate this problem because it fits flat across the bucket lip.

The NEW Estex 1831, is an injection-molded part, which insures strength and consistent quality. The material is a high-grade polymer; the same as in our other fine injection molded products.

\*Safe & Proper Fit

\*Fits New and Older Buckets

\*High Break Strength

\*Great in Cold Weather

\*Also Designed for use with Long Lipped Liners (3" Long)

\*Use as a Clamp to keep liners from bouncing out or being suctioned out.

Old Style Hook with standard liner notice the width increase.
