- Water Proof to 20 ft. (6 m)
- Fire & Impact resistant
- \*Meets NFPA Fire Resistant Requirements: 500° F (200° C) for 30 minutes

This Aerial Bucket Apron has many tool pockets and pouches dispersed over two rows, each row illuminated by a compact, powerful LED flashlight for maximum visibility during night-time jobs

The aerial bucket acts as a reflector to amplify the luminosity of the LED Flashlights, producing a daylight-like effect

Lights on product provide the only light for this image. No flash, overhead lighting, or daylight used. Image captured in otherwise total darkness.

Flashlights boast 10 white bulbs and 2 intensity settings to customize your workstation illumination. Light pockets hold lights extremely snug but allow for removal to facilitate light maintenance/replacement.
